

Change faucet centersets using a coordinating faucet plate.

Faucets different than your vanity top. Order a faucet plate to change the faucet centers on your top. Plate can be a single center, 4" centers, or 8" centers. Designed to fit curve of your bowl (Shown on recessed oval bowl).

1. Position plate and mark placement of centersets. Drill faucet hole using a holesaw with a 3/8" pilot drill.

2. Use adhesive to attach plate to countertop.

3. Install faucet normally, and caulk around faucet plate. We recommend color coordinating caulk available at your U.S. Marble dealer.
